

# TRIOPLAST Top sheet & Top sheet film

The packaging is essential to guarantee your customers the product quality they expect, and to ensure top quality all the way to your customers you must prevent your goods against dust and moist. Using stretch film and top sheets from Trioplast gives stability and protection to your pallets ensuring the same top quality as when it left your warehouse.

*Trioplast Topsheets for maximum protection!*

PRODUCT DATA							
Item no.	Thickness [micron]	Width [mm]	Length [m]	Sheets/ reel	Colour	Reel gross weight [kg]	Reels/ pallet
<b>TOP SHEET</b>							
5476	30	1300	1700	300	Transp.	18,4	25
5076	35	1300	1700	200	Transp.	14,3	25
4435	50	1300	1700	130	Transp.	13,5	28
7712	50	1300	1700	130	Black	13,5	28
6485	50	1300	1700	130	White	13,7	28
<b>TOP SHEET FILM</b>							
4708	50	1300	400	-	Transp.	24,5	18
2886	50	1600	500	-	Transp.	37,7	20
8173	50	1800	500	-	Transp.	42,4	20

We certify that:

- all film material is based on raw material of polyethylene
- all film material is free from and is not used in the process of manufacturing:
  - DMF (dimethylfumarate )
  - BPA (Bisphenol A)
  - PBDE (Polybrominated diphenyl ethers)
  - Phthalates
  - Halogens and chlorine in general
  - Antimony trioxide
- the raw material and additives does not contain any substances in the level that is dangerous to health or environment, according to ECHA Candidate list, Reach 1907/2006/CE.
- all film material complies with the requirements given in the EU Directive on Packaging and Packaging Waste 94/62/EC, namely that the sum of incidental concentration levels of **lead, mercury, cadmium and hexavalent chromium** present shall not exceed 100 parts per million by weight.
- in cases where the regulated metals are present at levels below 100 parts per million by weight, they were not intentionally added during the manufacturing process.
- we do not intentionally add or use nanomaterials, which by definition has one or more dimensions of the order of 100 nm or less.
- we do not intentionally add or use materials, which may have a size above the order of 100 nm but retain properties that are characteristic to the nano scale.

Recommendations regarding packaging of food

The film can be recommended to be used together with food at its intended use. With the intended use is meant wrapping of goods on pallet where the food is already packed with a sufficient barrier, such as carton and inner bag. Any other type of use of the film together with food is to be regarded as not the intended use and must be tested or assessed in each individual case.

Others:

It is the company wrapping or packaging the goods that is responsible for the final package, therefore also that this document has sufficient information for the intended use.
