

## PRODUCT SPECIFICATION CORRUGATED BOARD

### 63B

Smurfit Kappa Norpapp's art.no.	Purpose	Dim. L+W+H Inner dim. mm	Constr. code	Pack. weight	Quality code	Remarks
NA	NA	NA	NA	NA	63B	

Corrugated board consists of wooden fibres and maize starch. These materials are renewable and recoverable and are not harmful to the environment. All types of corrugated board consist of both virgin fibres and waste based fibres or only waste based fibres. Inks used in our production are water-based.

Quality Code	Surface weight g/m <sup>2</sup>	Thickness mm	Müllén kPa	Edge Crush Test ECT kN/m	Waste based fibre %
63B	370	2,98	1150	5,1	50%
Tolerances	+/- 5%	+/- 2%	+/- 10%	+/- 10%	

Dimension and weight vary with climate conditions. Strength figures are average values.

#### Hygiene practice

All packaging delivered from Smurfit Kappa Norpapp are approved in direct contact with dry foods according to BGVV and EU-directives. Our corrugated board is not approved in direct contact with fat and wet foods unless the inner liner has a blocking layer.

This specification is made by the quality assurance department and the laboratory at Smurfit Kappa Norpapp AS and has a duration of 2 year from: *September 2017*
